

TRI CITY REGIONAL SANITARY DISTRICT

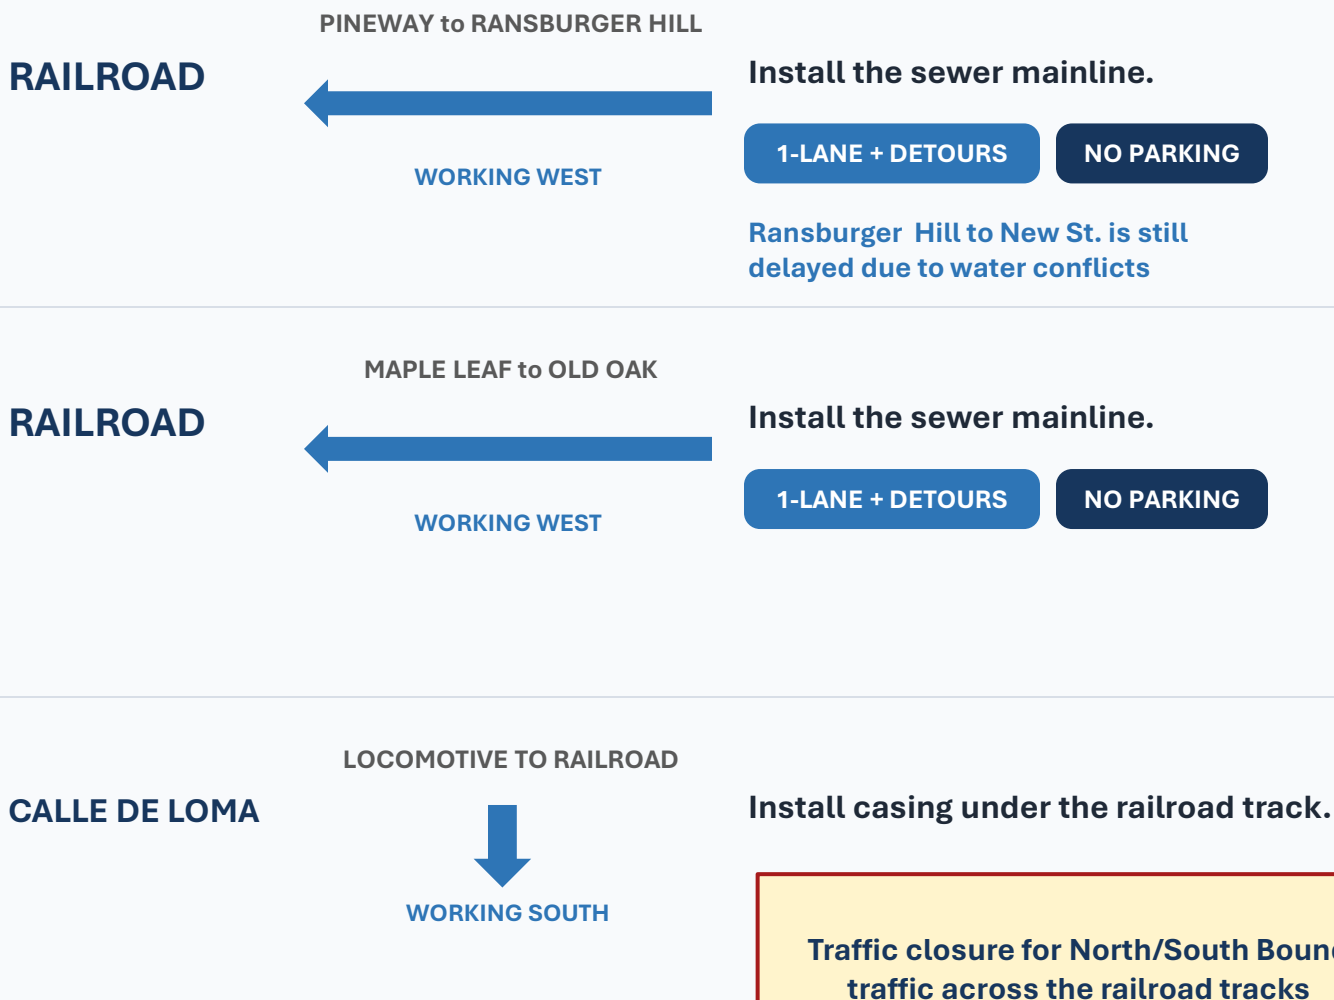

WASTEWATER CONSTRUCTION UPDATE

DO NOT ENTER CONSTRUCTION ZONES

1 Four activities move the project forward

2 Street-by-street work and traffic impacts

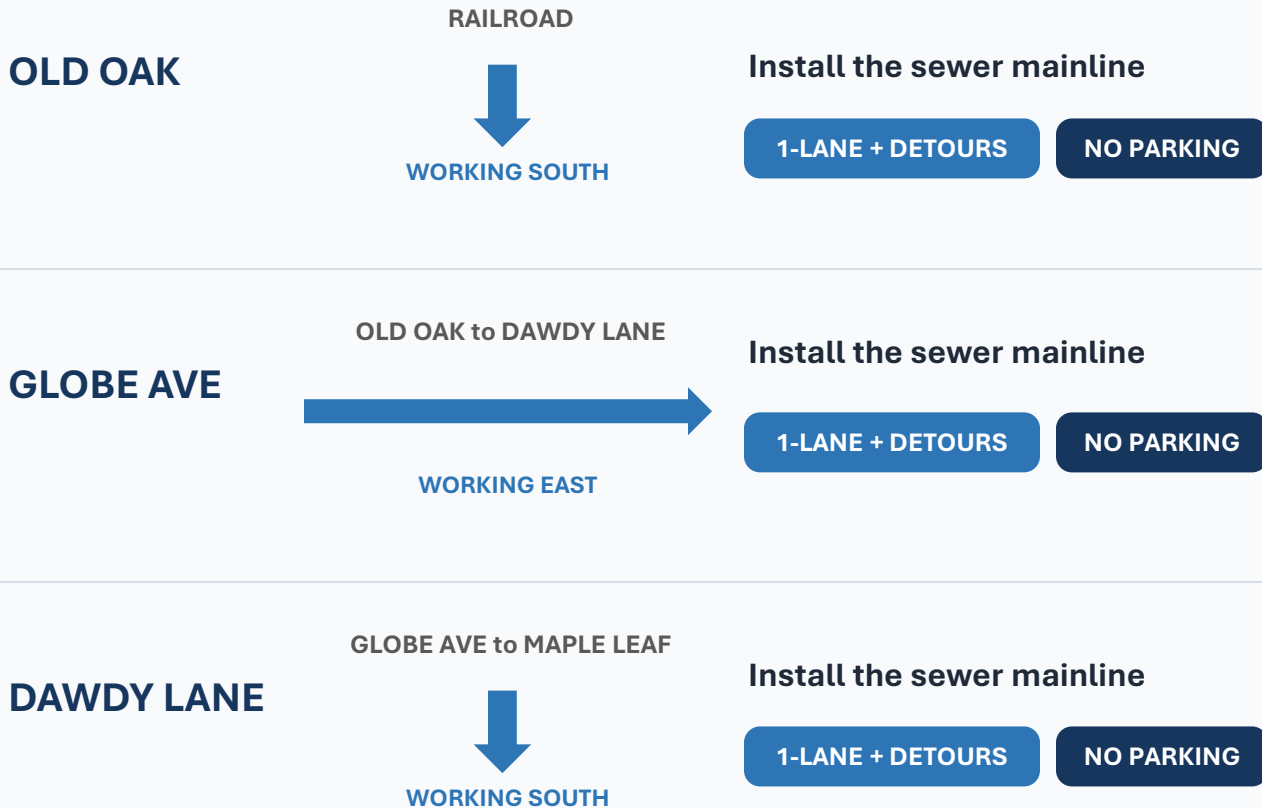

TRI CITY REGIONAL SANITARY DISTRICT

WASTEWATER CONSTRUCTION UPDATE

DO NOT ENTER CONSTRUCTION ZONES

2 Street-by-street work and traffic impacts

THRU TRAFFIC RESTRICTION

Thru traffic in the area of the Main Lift Station - SE Corner of Pinal Mountain Little League Field will be restricted for the next 3-4 months.

HOW ACCESS AND EMERGENCY RESPONSE WILL WORK

DO NOT ENTER CONSTRUCTION ZONES

3 DAYS BEFORE WORK

Barricades will show where crews are moving next.

NO ROADWAY PARKING

Vehicles left in posted areas may be towed at the owner's expense.

Road restoration includes asphalt patching, gravel-road regrading, and final cleanup after testing.

Follow speed limits and signs. Dirt, sand, and gravel can be hazardous. Fewer obstructions help crews finish faster.

3 Roadway work hours

MONDAY-THURSDAY

6:00 AM - 5:00 PM

FRIDAY

6:00 AM - 12:00 PM

Within these hours, roadway access is limited to emergency or planned access. Follow posted barricades and detours.

Crews will install gravity mainline, force main, service lines, and precast concrete/polymer concrete manholes.

4 Plan ahead for access

A

PROPERTY ACCESS

Temporary parking and driveway limitations near active work. B4 will establish detours when conditions allow; access may still be limited.

+

MEDICAL APPOINTMENTS

Homeowners must provide the project team a list of prescheduled doctor appointments in advance so access can be reviewed and evaluated.

5 Emergency vehicles will ALWAYS have a path to you

1

Keep the route recoverable

Steel plates and equipment remain in the work area. Crews make every effort to keep backfill close behind mainline installation.

2

Clear the road for EMS

During an emergency, crews will quickly plate excavations and clear the roadway so emergency vehicles can pass.
